FULL STACK WEB DEVELOPER

(Business Systems | Dashboards | Workflow Automation | Digital Solutions)

Professional Summary

Full Stack Web Developer with 3+ years of experience designing and building secure web applications, business management systems, interactive dashboards, and data-driven digital solutions. Proficient in React, TypeScript, Python (Django/Flask), Node.js, REST APIs, PostgreSQL, and MySQL, with a proven ability to translate business requirements into scalable software solutions. Experienced in workflow automation, reporting systems, user authentication, cloud deployment, and backend architectures that improve operational efficiency and support data-driven decision-making.

Core Skills

- Full-Stack Web Development (React, TypeScript, JavaScript, HTML5, CSS3)
- Backend Development (Python, Django, Flask, Node.js, Express)
- Database Design (PostgreSQL, MySQL, SQLite)
- REST APIs & System Integration
- Authentication & Role-Based Access Control
- Dashboard & Reporting Development
- Workflow Automation & Business Systems
- Responsive UI/UX Design
- Git, GitHub, Docker, CI/CD, Linux
- Cloud Deployment
- AI Integration & Automation
- Agile Development & Technical Documentation

Professional Experience

Full Stack Software Developer | Business Systems & Digital Solutions

Nairobi | July 2024 – Present

- Designed and developed secure web applications that automate business processes and improve operational efficiency.
- Built over 20 REST APIs supporting reporting workflows, user management, and data exchange between systems.
- Developed role-based authentication, secure backend services, and business logic for enterprise applications.
- Designed relational databases for efficient storage, reporting, and retrieval of operational data.

- Performed functional testing, debugging, and feature validation to ensure software quality before deployment.
- Produced technical documentation, API documentation, and deployment guides to support maintenance and user adoption.
- Collaborated with stakeholders to translate business requirements into practical software features and user workflows.
- Improved application performance, usability, and maintainability through continuous testing and optimization.
- Managed deployment using Docker, GitHub Actions, Linux, and cloud hosting environments.

Selected Projects

Property Management Business Intelligence Dashboard

Next.js | TypeScript | Tailwind CSS | Recharts | PapaParse

Github: <https://github.com/Ka-few/Rental-Property-Business-Intelligence-Dashboard>

Live Demo: <https://rental-property-business-intelligen.vercel.app/>

- Designed and developed an interactive Business Intelligence dashboard that transforms rental portfolio data into actionable insights for property managers.
- Designed a modular architecture capable of integrating with backend APIs and external data sources for real-time reporting.
- Built KPI dashboards displaying revenue, occupancy, late payment rates, and average rent per unit.
- Developed interactive charts including revenue trends, occupancy analysis, payment distribution, and late payment tracking using Recharts.
- Implemented dynamic filtering by property and payment status, enabling real-time exploration of portfolio performance.
- Built revenue forecasting using moving-average models to support financial planning and decision-making.
- Processed and transformed CSV datasets into structured business intelligence visualizations.
- Designed responsive interfaces optimized for desktop and mobile users using Next.js and Tailwind CSS.

Beauty Parlor Management System

React | Flask | SQLAlchemy | JWT | SQLite

Github: <https://github.com/Ka-few/Beauty-parlor-app>

Live Demo: <https://beauty-parlor-app-ztgj.vercel.app/>

- Developed a full-stack appointment management platform supporting customer bookings, service management, and administrative workflows.

- Implemented secure JWT authentication and role-based access control for customers and administrators.
- Designed and developed secure RESTful APIs for appointments, services, payments, user management, and customer reviews.
- Integrated M-Pesa payment initiation to streamline booking transactions.
- Developed administrative dashboards providing booking, revenue, and customer usage analytics.
- Deployed the frontend to Vercel and backend services to Render.

Sales & IT Support Officer

Datacomm Systems & Solutions | Nakuru | Nov 2016 – Apr 2024

- Installed, configured, and maintained business software and network infrastructure.
- Assisted in the implementation and support of business applications, ensuring reliable system performance and user satisfaction.
- Supported deployment and troubleshooting of enterprise systems for multiple clients.
- Worked directly with users to identify operational needs and recommend technology solutions.
- Maintained system documentation and provided user training.
- Assisted with software implementation, upgrades, and technical support

Education

Bachelor of Science in Information Technology

Jomo Kenyatta University of Agriculture & Technology | 2013

Certifications & Professional Development

Software Engineering Certificate

Moringa School | May 2025 – Nov 2025

- Intensive training in full-stack development, system design, microservices architecture, and modern DevOps practices.
- Built scalable backend systems and production-ready applications.

Oracle Database: Introduction to SQL

Computer Pride | Jan 2016 – May 2016

Oracle Database 11g: Administration Workshop I

Computer Pride | Jan 2016 – May 2016

- Database installation, user management, backup and recovery concepts, performance monitoring, and system optimization.
