Professional Summary

Results-driven Junior Software Developer & IT Support Specialist with a BSc in Information Technology and certifications in Oracle SQL & Administration. Skilled in web development, backend APIs, troubleshooting, and database management. Experienced in delivering digital solutions for small businesses and farmers, including apps for e-commerce, goal tracking, and veterinary services. Passionate about building scalable systems and open to global remote roles.

Technical Skills

- Languages & Frameworks: JavaScript (ES6+), Node.js, Express, React, HTML, CSS, SQL, Python (basics), Rust (learning)
- Databases: MySQL, PostgreSQL, MongoDB, JSON-based data handling
- Concepts: API development (REST), data structures & algorithms, OOP, system troubleshooting
- Tools & Platforms: Git/GitHub, Linux/Ubuntu, VS Code, Agile collaboration
- Other Skills: Problem-solving, client communication, IT technical support

Key Projects

- Digital Bull Semen Catalogue (Backend API) – Node.js, Express

Designed REST API endpoints to manage veterinary data, enabling scalable farmer access to breeding services.

- Smart Goal Planner App – React, Chart.js

Developed goal-tracking features with visual progress charts; improved user engagement through dynamic state updates.

- Mama Mboga Online Grocery Shop – React, React Router

Built an e-commerce platform with product management, shopping cart, and static pages to support local business digitization.

Professional Experience

- Freelance Web Developer & IT Support Specialist | 2021–Present
 - Delivered responsive websites and applications for SMEs, enhancing client sales and customer engagement.
 - Integrated payment systems and databases, ensuring secure transactions and smooth data handling.
 - Provided remote and onsite IT support: troubleshooting hardware/software issues and training users.
- IT Technical Support & Sales Representative | Various Roles
 - Resolved technical issues for hardware/software, reducing downtime for clients.
 - Matched IT solutions with business needs, boosting customer satisfaction and driving sales.
